

Cpsc 216 - More JavaScript

The If - Else Statement

→ again, you have seen the basic structure before.

```
if (condition) {  
    ...  
    do things  
    ...  
}  
else {  
    ...  
    do other things  
    ...  
}
```

Let's look in detail at an example:

index-javascript-if-else.html

Notes:

- ① CSS definitions in the <head> section can define the behavior of certain pre-defined tags. What about defining some other special tag, just for us?

```
<head>  
  <style>  
    ...  
    span {  
      color: red;  
    }  
  </style>  
</head>  
<body>  
  ...  
  <span> Some Text </span>  
  ...  
</body>
```

↙ CSS for span applied here!!!

Graphics using JavaScript

It is possible to use JavaScript to draw graphics !! Let's have a look

at an example, and see if we can

... READ code that

follow the way i.e. some one else has written!
index - analog - clock .html

Notes:

① <style>
 • hour-input {
 color: blue;
 width: 30px;
 margin-right: 5px;
 }

</style>

→ These CSS rules will be applied to HTML elements with the class hour-input

<input type="number" class="hour-input"
 min="1" max="12" value="12"
 id="hourInput">
