Zylabs 5.11 → Flexbox Logout

In This problem, we are provided with an html file, an image, and a file

Styles.css

* rename oatmeal-cookies.html to index.html for testing!!

* styles.css already has some rules in it ⤳ Don't change any of Those!!

→ we will add additional rules above those rules, as indicated.

1. <header> tags : Set display to be flex, and Justify-content to be space-between.

header {

```
display: flex;
justify-content: space-between;
}
```

Now, first follow the instructions to add rules for each of the requirements listed ! ☺
