The Band Web Page - Revisited

Back in Chapter 2, we created a simple, dated band web page.

Now, we want to add some **style** to it!! Rather than follow a set of "rules" provided for us, we will think about how we want the page to look, and then implement rules to accomplish this!

① Let's give the page some color!

    (i) Put in a BG color → I like bluish

```
# 0000 7f
    r  g  b
```

⭐ (ii) make the main title white, to stand out against the blue

    (iii) make the rest of the text greyish, (equal parts r,g,b) maybe # 7f7f7f

```
:root {

    -- header-color:  white ;
    -- font-color :   #7f7f7f ;
    -- bg-color :  # 00007f ;

}

body {
    color : var ( -- font-color );
    background-color : var ( -- bg-color ) ;

}

h1 {
    color : var ( -- header-color ) ;
}

h2 {
    color : var ( -- header-color ) ;
}
```

I notice that the links are ...
great. Let's add some rules to update
that.

(i)   make links the same font-
     color as the rest of the
     page.

(ii) Change color if you "hover"
     over a link.

(iii) Don't change the color if you
     visit a link → I don't like that.

(iv) Choose a different color for "active"
     links.(color change when you "press"
     on the mouse)

---

③
The next thing that I notice is
that the font style is very dated.

☆ ① Sans-serif style fonts
    just look way better !!
                    (body)

☆ ② Make the section headings
     stand out (h2)

☆ ③ Let's make the navigation
     links stand out a bit more !!
                        (nav.

☆ ④ Make the main heading
     stand out (h1)

So, the biggest problem that I
still have is that I want the
band member info next to the picture!

To do this, we need to make some
changes to the HTML code. We
need to add each band member
image to a new class, so
that we can apply rules to that
class.

→   class = " band - members "

→ add to each img `~]`

• band-members {
    float: left ; ← inches ims float left
    clear: both ; ← clears before reset img !
}

members ul {
    float: left ;
}

members {
    display: inline-black ;
}

Final Quibble: The spacing and padding and margins are not ideal.

And, a final, final Quibble:
